ENVIRONMENTAL POLICY

Infratek is committed to minimize the impact of our activities on the environment, and we are working continuously to improve our environmental performance as an integral part of our business strategy and operating practices. This will help us achieve our vision of becoming the preferred critical infrastructure partner to Nordic customers within our field of services.

We base our environmental activities on the principles and standards described in ISO 14001.

Infratek's core values; presence – job satisfaction – movement; are the basis for our business and play an integral part in our environmental management.

The key points of our strategy to achieve our environmental goals are:

- Comply with or exceed all relevant regulatory and client requirements.
- Define key areas for improvement of environmental performance, as for instance transportation (i.e. CO2 emissions), energy consumption and environmental spills.
- Monitor and set targets for our environmental performance
- Increase employee awareness and offer the relevant environmental training
- Incorporate environmental factors into business decisions
- Encourage our suppliers to adopt same or similar principles for environmental management

All employees have a responsibility in their area to ensure that the aims and objectives of this policy are met.

Our management system, GAIA, gives more details about our environmental management processes, including instructions, templates and other relevant documents.

September 2016

Lars Bangen

CEO, Infratek AS
